

NO TO NEW REGULATIONS

I, the undersigned, OPPOSE the California Air Resources Board’s proposal to force new vehicle manufacturers to warranty a vehicle emissions system for 15 years / 150,000 miles. Not only is the impact on consumer choice in the independent aftermarket at stake, but CARB does not have the statutory authority to make this change in the first place. Further, it has produced no scientific evidence that warranties impact air quality at all, nor has it comprehensively measured what the economic dislocations will be. This plan is impractical and unnecessary and will harm our industry in multiple ways. Current technology is not available to warrant the emission system parts for that length of time. In addition, vehicle owners getting warranty repairs on their emission system will also be solicited by the new car dealers for all other maintenance and repairs ultimately locking the independent aftermarket out of the maintenance and repair segment until a vehicle is at least 15 years old.
